ESCALADE	6200	6B	L86	313	Direct Aspirated	ECU	2015	LPG	Automatic

On EZ SDI 2.0 system, the VSR strategy can be enabled; this strategy can use some petrol fuel even when the vehicle is running on gas, in case of special engine conditions - such as full load, operating speed... – in order to preserve the engine components. The amount of petrol the system needs can change depending on applications and driving mode.
